**Subject: Well Abandonment Report
Cornerstone Redevelopment Brownfields
Henderson, Nevada**

Dear Ms. Johnson:

Kleinfelder, Inc. (Kleinfelder) is pleased to submit this letter report summarizing the well abandonment activities for the Cornerstone Redevelopment Area near the corner of Stephanie Street and Wigwam Parkway in Henderson, Nevada. There were a total of six wells abandoned. The depths of these wells ranged from 19 feet (MW-4 and MW-6) to 35 feet (MW-2) below ground surface (bgs).

The wells were abandoned following the requirements set forth in NAC 534.4365. The original wells were installed without bentonite leaving the casings difficult to remove without breaking they were crooked inside the borings. Therefore, each well was over-drilled with a hollow stem auger drill rig. Each over-drilled boring was then back filled with a bentonite grout.

This completes our scope of work on the Cornerstone project. We will submit a final invoice in January 2007 so the project can be closed. We appreciate the opportunity NDEP has provided Kleinfelder to provide service under your Brownfields program. Please call us if you have any questions or require additional information.

Respectfully submitted,

KLEINFELDER, INC.

Gary A. Carter, P.E., C.E.M.
